

TRADECRAFT:

STOCK MARKET LEARNING PLATFORM

Submitted By:
Koushik Adak (2211981201)

Introduction

TradeCraft is an interactive web and mobile platform designed to simplify stock market education for beginners and intermediate learners. It combines structured lessons with real-time trading simulations to provide a balanced, hands-on learning experience. Key features include tutorials, quizzes, virtual trading, leaderboards, and personalized progress tracking. Built with modern technologies like React, Flutter, Node.js, and MongoDB, TradeCraft offers a secure, scalable, and engaging environment that promotes financial literacy and helps users become confident investors.

Technology Stack

- Frontend: React, Flutter, Tailwind CSS, Three.js
- Backend: Node.js, Express
- Database: MongoDB Atlas, Firebase
- Security: Google OAuth 2.0, JWT

UseCase diagram

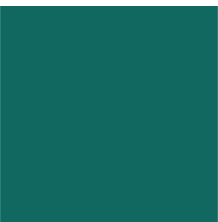

Limitations

- Only virtual trading, no real-money integration.
- Limited to certain markets; lacks global coverage (forex, crypto, etc.).
- Performance issues possible with large-scale real-time data.
- Needs constant internet; low accessibility in poor connectivity areas.
- Modules mainly for beginners/intermediates, less depth for advanced learners.
- Gamification is basic (leaderboards/quizzes only).
- Limited AI personalization and adaptive learning.

Future Scope

- Add live stock APIs and optional micro real investments.
- Expand to global markets & more asset classes (forex, crypto, commodities).
- AI-driven adaptive learning with personalized feedback.
- Richer gamification (badges, tournaments, rewards).
- Community features like forums and mentorship.
- Advanced analytics with career guidance.
- Support for multiple languages & accessibility tools.
- Explore AR/VR for immersive trading simulations.
- Certification tie-ups with financial institutions.
- Stronger security with blockchain and advanced encryption.

THANK YOU
